B-BPR410

The Dalton Medical BED-420 Ultra Low Long Term Care Bed combines resident safety, comfort, and versatile electric positioning in a durable, low-profile design. The bed electrically lowers to approximately 3.9" from the floor to help support safer resident care, while the stepped lowering system helps reduce foot-entrapment risk. A four-motor electrical system provides powered adjustment of the backrest, knee section, bed height, and Trendelenburg/reverse Trendelenburg positioning. Its compact sectional design allows the bed to disassemble into four sections for easier transportation and storage. Available with Cherry or Oak finish headboard and footboard to complement a variety of care environments.

Key Features

- **Ultra Low Design:** Electrically lowers to approximately 3.9 from the floor.
- **Stepped Lowering system:** Helps reduce foot-entrapment risk
- **Four-Motor Electric System:** Powered backrest, knee section, bed height, and positioning adjustments
- **Auto-Contour Positioning:** Adjust the backrest and knee section together
- **Trendelenburg Positioning:** Provides Trendelenburg and reverse Trendelenburg up to $\pm 12^\circ$.
- **Compact Sectional Design:** Disassembles into four sections for transportation and storage.
- **Two Finish Options:** Available in cherry (BED-420-C) or Oak (BED-420-O).

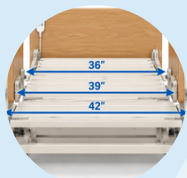

Technical Specifications

Sleeping Surface (W x L)	36" x 80"
Bed Height Range	3.9" - 22"
Safe Working Load (SWL)	450 LBS
Weight in Carton (Deck / Boards)	251 lbs
Weight out of Carton (Deck / Boards)	231 lbs
Back Rest / Knee Break Angle	0° - 70° / 0° - 33°
Caster Size	3" Locking Casters
Number of Motors	4
Power Supply	100-240V / 50-60Hz
Max Power Consumption	200 W
