

Posture is *key*.

Standard wheelchairs have a backrest that does not optimally support the user's spine, resulting in a hunched posture with the head and shoulders bent forward. This unfavorable sitting position can cause pain and other health problems.

The Strongback wheelchair is the first lightweight folding wheelchair that effectively supports the user's back. Its unique ergonomic shape promotes a healthy upright sitting position and ensures unique comfort and convenience from the very first moment.

UNIQUE

Patented, adjustable ergonomic backrest for unmatched postural support, on every chair in the range.

AWARD-WINNING

Lightweight wheelchair with a compact and easy folding design.

SUPERIOR QUALITY

Up to 300 lbs weight capacity, and 375 lbs on the Heavy Duty model.

THE NEW STANDARD OF COMFORT

The New Standard *of Comfort.*

Lightweight folding wheelchairs with patented, frame-integrated lumbar support. Comfort you feel from the first moment.

THREE INTERNATIONAL
DESIGN AWARDS

PATENTED ERGONOMIC
BACKREST

Strongback Heavy Duty²

The Strongback Heavy Duty is the first lightweight wheelchair with an impressive weight capacity of 375 lbs. Enjoy all of the well-known features of the Strongback wheelchairs with some additional high quality details.

FEATURES

375 lbs capacity

Lightweight and ergonomic frame supporting users up to 375lb

Reinforced frame

Built for bariatric use, and still folds.

Adjustable backrest

Supports the natural, healthy lumbar curve of the spine.

Drum brakes standard

In addition to the parking brakes.

22" seat width

19" seat depth, 20" seat height.

31" overall width

Home-compatible: fits a standard 32" doorway.

Weight 27.8 lbs

Light for its class, frame only.

24" rear wheels

Self-propelled, quick-release.

Ask your dealer for more information.

¹ Comfort: 16", 18" and 20" seat, weight = 15 to 16.3 lbs.

² Heavy Duty: 22" seat, weight = 27.8 lbs.

³ Excursion: 18" and 20" seat, weight = 26.0 to 26.5 lbs.

Ask your dealer for all other specifications.

Strongback Comfort Series¹

The Comfort is the self-propel core of the range, in three seat widths with quick-release rear wheels and a 300 lbs capacity. Every chair carries the patented Strongback backrest.

FEATURES

Adjustable backrest

Supports the natural, healthy lumbar curve of the spine.

Improved centre of gravity

Stable, predictable handling in daily use.

Swing-away, detachable footrests

Effortless transfers in and out of the chair.

Quick-release wheels

For easy stowage and trunk-friendly transport.

Clothing guard side panels

Keeps clothing clean and clear of the wheels.

Detachable anti-tippers

Confident, stable stops.

Ergonomic comfort-grip handles

Easy on hands, sure on grip, for caregivers.

Desktop-length armrests

Slide right under tables, desks and counters.

Double crossbar

Increased lateral stability on Comfort M, L and Flip models

3-position rear axle

Comfort M, L and Flip.

Ergonomic hand rim

Comfortable, efficient self-propulsion.

Attendant brake

Standard on Comfort M and L.

Strongback Excursion Series³

The Excursion is the attendant-pushed transit chair, from 26.0 lbs, built for travel and everyday transfers. The same patented backrest, in a lighter, narrower frame.

FEATURES

Adjustable backrest

Supports the natural, healthy lumbar curve of the spine.

Ergonomic comfort-grip handles

Easy on hands, sure on grip, for caregivers.

Swing-away, detachable footrests

Effortless transfers in and out of the chair.

Desktop-length armrests

Slide right under tables, desks and counters.

Clothing guard side panels

Keeps clothing clean and clear of the wheels.

Attendant brakes

Fitted standard on Excursion models.

Compact folding frame

Folds flat in seconds. Fits every trunk.

Weight from 26.0 lbs

Light enough to lift, day after day.

18" and 20" seat widths

Excursion 12 M and L.

Note Excursion is a transit range: the rear wheels stay on for transport, so the quoted weight is the whole chair. Specifications subject to change without notice.
